Career Objective:

I am a dedicated Java Full Stack Developer with a strong foundation in Core Java, Spring Boot, Hibernate, and web technologies. With a Bachelor of Electronics and Communication, I have developed key projects like inventory management systems and responsive websites. I thrive in collaborative environments and continuously seek opportunities to enhance my coding skills and contribute to dynamic development teams.

Technical Skills:

- **Languages:** Java (J2SE, J2EE)
- **Frameworks:** Spring, Spring Boot
- **Web Technologies:** HTML, CSS, Bootstrap, JavaScript
- **Databases:** MySQL
- **Tools:** Eclipse, Maven, GitHub
- **Soft Skills:** Problem Solving, Team Collaboration, Communication

Technical Proficiency:

- Proficient in Java 8 features, including Lambda expressions, Stream API, and Functional Interface.
- Good Knowledge of Exception Handling, Collections Frameworks, Multithreading and JVM Architecture.
- Strong understanding of OOP concepts: Encapsulation, Abstraction, Inheritance, Polymorphism.
- Frontend experience with HTML, CSS, and Bootstrap for creating interactive web pages.

Educational Qualification:s

Narasaraopet Engineering College, Narasaraopet, AP

Bachelor of Electronics and Communication CGPA- 7.94 2021-2025

Sri Chaitanya Junior College, Chilakaluripet, AP

Intermediate – MPC CGPA: 8.7/10.0 2019-2021

Chaitanya High School, Chilakaluripet, AP

10th Class CGPA: 9.5/10.0 2018-2019

Projects:

Car Rental Service Management (Spring Boot, MySQL)

- Developed a Car Rental Service web application using Spring Boot, enabling users to browse, book, and manage rental cars.
- Implemented RESTful APIs for car listing, booking, customer management, and payment handling.
- Built CRUD functionalities for cars, customers, and bookings.
- Integrated Spring MVC architecture for handling user requests and responses.
- Used Postman for API testing and debugging.

Inventory and Stock Management (Java, Servlets, JSP, MySQL)

- Developed an inventory and Stock Management system to manage product efficiency.
- Allowed managers to add new products, update products, and organise items by category.
- Monitored inventory levels in real time and provided low-stock alerts to prevent shortages.
- Implemented secure role-based login to ensure authorised access and system security.

ATM Simulation(Core Java, OOP, Exception Handling)

- Engineered a console-based ATM application using Core Java and OOP principles.
- Integrated authentication, balance inquiry, withdrawal, deposit, and PIN update features.
- Applied exception handling and modular architecture to ensure reliable execution.

Coffee Website(HTML, CSS, Bootstrap)

- Designed and developed a responsive Coffee Bliss website with structured sections like Home, About, Menu, and Contact.
- Implemented a visually appealing hero banner with background image and overlay text ("Fresh Coffee, Fresh Day").
- Used Bootstrap navbar and grid system for smooth navigation and mobile-friendly layout.
- Created an About section with clean typography and content alignment for better readability.

A Mixed Strategy-Based Improved Whale Optimisation Algorithm for Multilevel Thresholding Image Segmentation.

A project focused on improving image segmentation using an advanced algorithm

- Enhanced the traditional Whale Optimisation Algorithm by incorporating adaptive control parameters and hybrid search mechanisms
- Achieved better balance between exploration and exploitation
- Efficiently determined optimal threshold values for clearer and more accurate image segmentation
- Demonstrated that the MSI-WOA outperforms techniques such as Otsu, PSO, and standard WOA

Certifications:

Certification from Solo-Learn based on "Introduction to SQL".
